# Demographics

## OVERVIEW

Utah's population is characterized by its young median age, high level of education and large family size. The people of this state exceed national averages by a large margin with a population that is on average almost eight years younger and households that are roughly 20% larger. The benefits Utah brings to businesses are substantial, providing an abundance of smart, young individuals who are motivated to work and eager to succeed.

The charts in this section quantify where the state stands compared to the nation and provide some insight of Utah's unique markets in comparison to one another. For purposes of clarity, each demographic section has been broken into categories that revolve around the following key topics:

- Population and Households
- Age
- Education
- Income
- Ethnicity

Located above each of these sections are highlights and key points from that page. These provide a short summary for each section. For additional information about specific county demographics, please visit the following link: <http://www.edcutah.org/countyProfiles.php>

### MSA Changes in Utah<sup>1</sup>

It is important to note changes to the definitions of Utah's metropolitan statistical areas (MSA's) and the addition of two micropolitan statistical areas.

The former Salt Lake-Ogden MSA has separated into two MSA's: 1) the Salt Lake City MSA (comprised of Salt Lake, Summit and Tooele Counties), and 2) the Ogden-Clearfield MSA (comprised of Davis, Morgan and Weber Counties.) Logan and St. George have been added as official MSA's in the state of Utah. The Logan MSA, located in northern Utah, is comprised of Cache County and Franklin County (located in Idaho). The St. George MSA, located in southern Utah, represents Washington County.

Utah has five micropolitan statistical areas: Brigham City, located in Box Elder County; Heber City, located in Wasatch County; Price, located in Carbon County; Vernal, located in Uintah County; and Cedar City, located in Iron County. Micropolitan statistical areas are classified as small urban centers with a population of 10,000 to 50,000.

## POPULATION AND HOUSEHOLDS

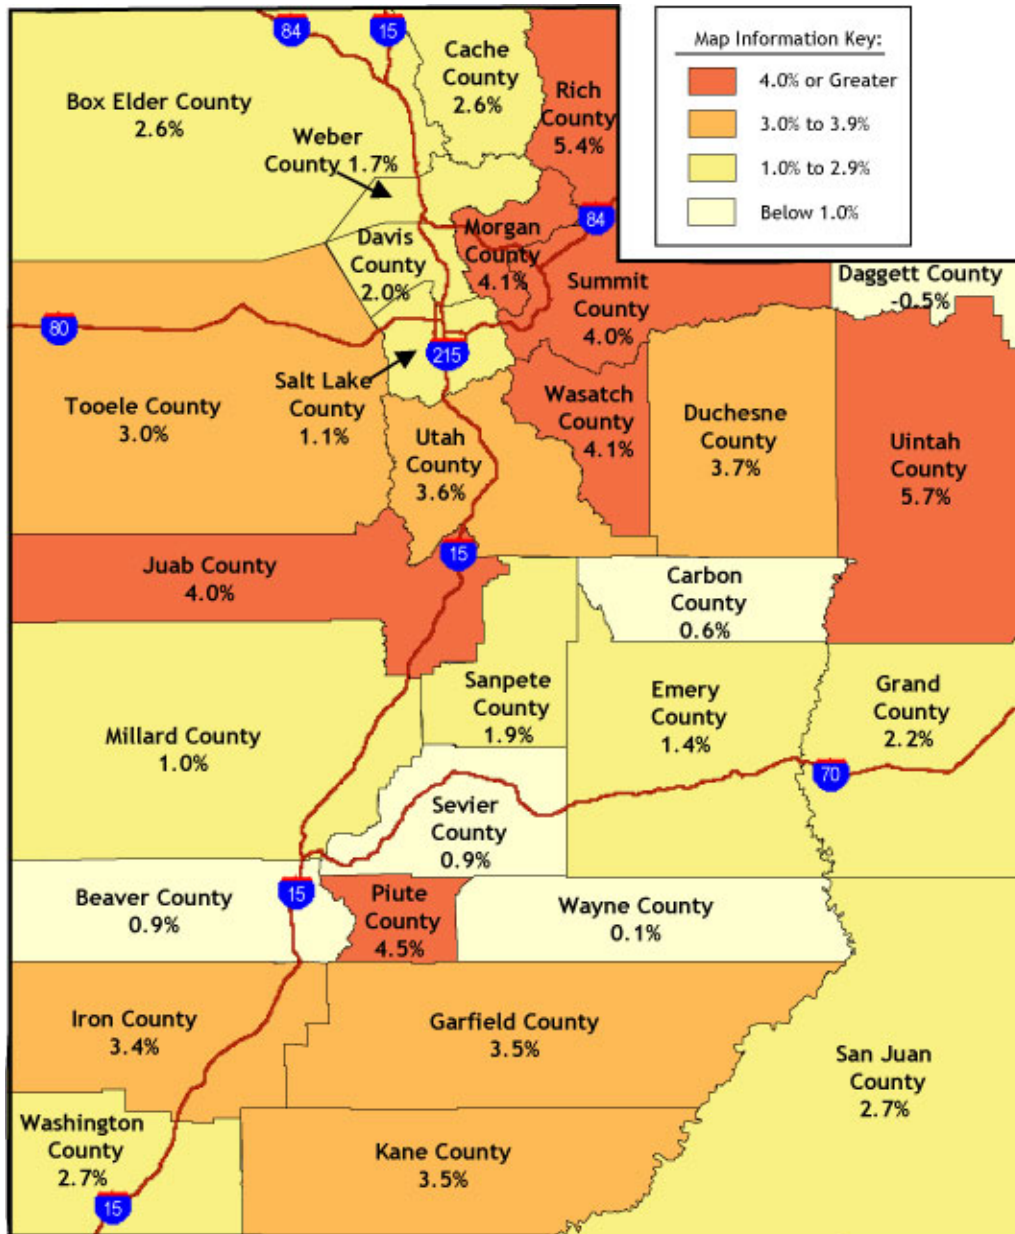

75.9% of Utah's population resides along the Wasatch Front, a four county geographic area surrounding Salt Lake City. The Wasatch Front is comprised of Weber, Davis, Salt Lake and Utah Counties. Utah has the largest median household size of any state in the United States, with most areas having at least three people per residence.

| Geographic Location          | Total 2008 Population | Population Density / Sq. Mile | Total Households |
|------------------------------|-----------------------|-------------------------------|------------------|

## INCOME

The average household income in Utah is slightly higher than the national average. Due to the state's large household size, per capita income is slightly lower than the national average. Park City is home to Utah's most prosperous citizens, with an average household income that is double the state average.

| Geographic Location          | Average HH Income | Per Capita Income | \$0 - \$24,999 | \$25,000 - \$34,999 | \$35,000 - \$49,999 | \$50,000 - \$74,999 | \$75,000 - \$99,999 | \$100,000+ |
